

WHILL

Move More. Live More.

Personalized Mobility Solution For All

ABOUT US

WHILL connects the world with personal transportation solutions. The mission is to deliver fun and innovative mobility for all. In addition, WHILL provides mobility-as-a-service, offering autonomous transportation services as well as on-site fleet and short-term rental services that make public spaces such as airports, hospitals and vacation destinations more accessible.

By focusing on product innovation and enhancement, it has also won various awards and recognitions. Its aim for global reach and community engagement has led to sustainability.

MISSION

To revolutionize personal mobility with innovative, stylish solutions, empowering individuals with mobility challenges to navigate the world with confidence and dignity.

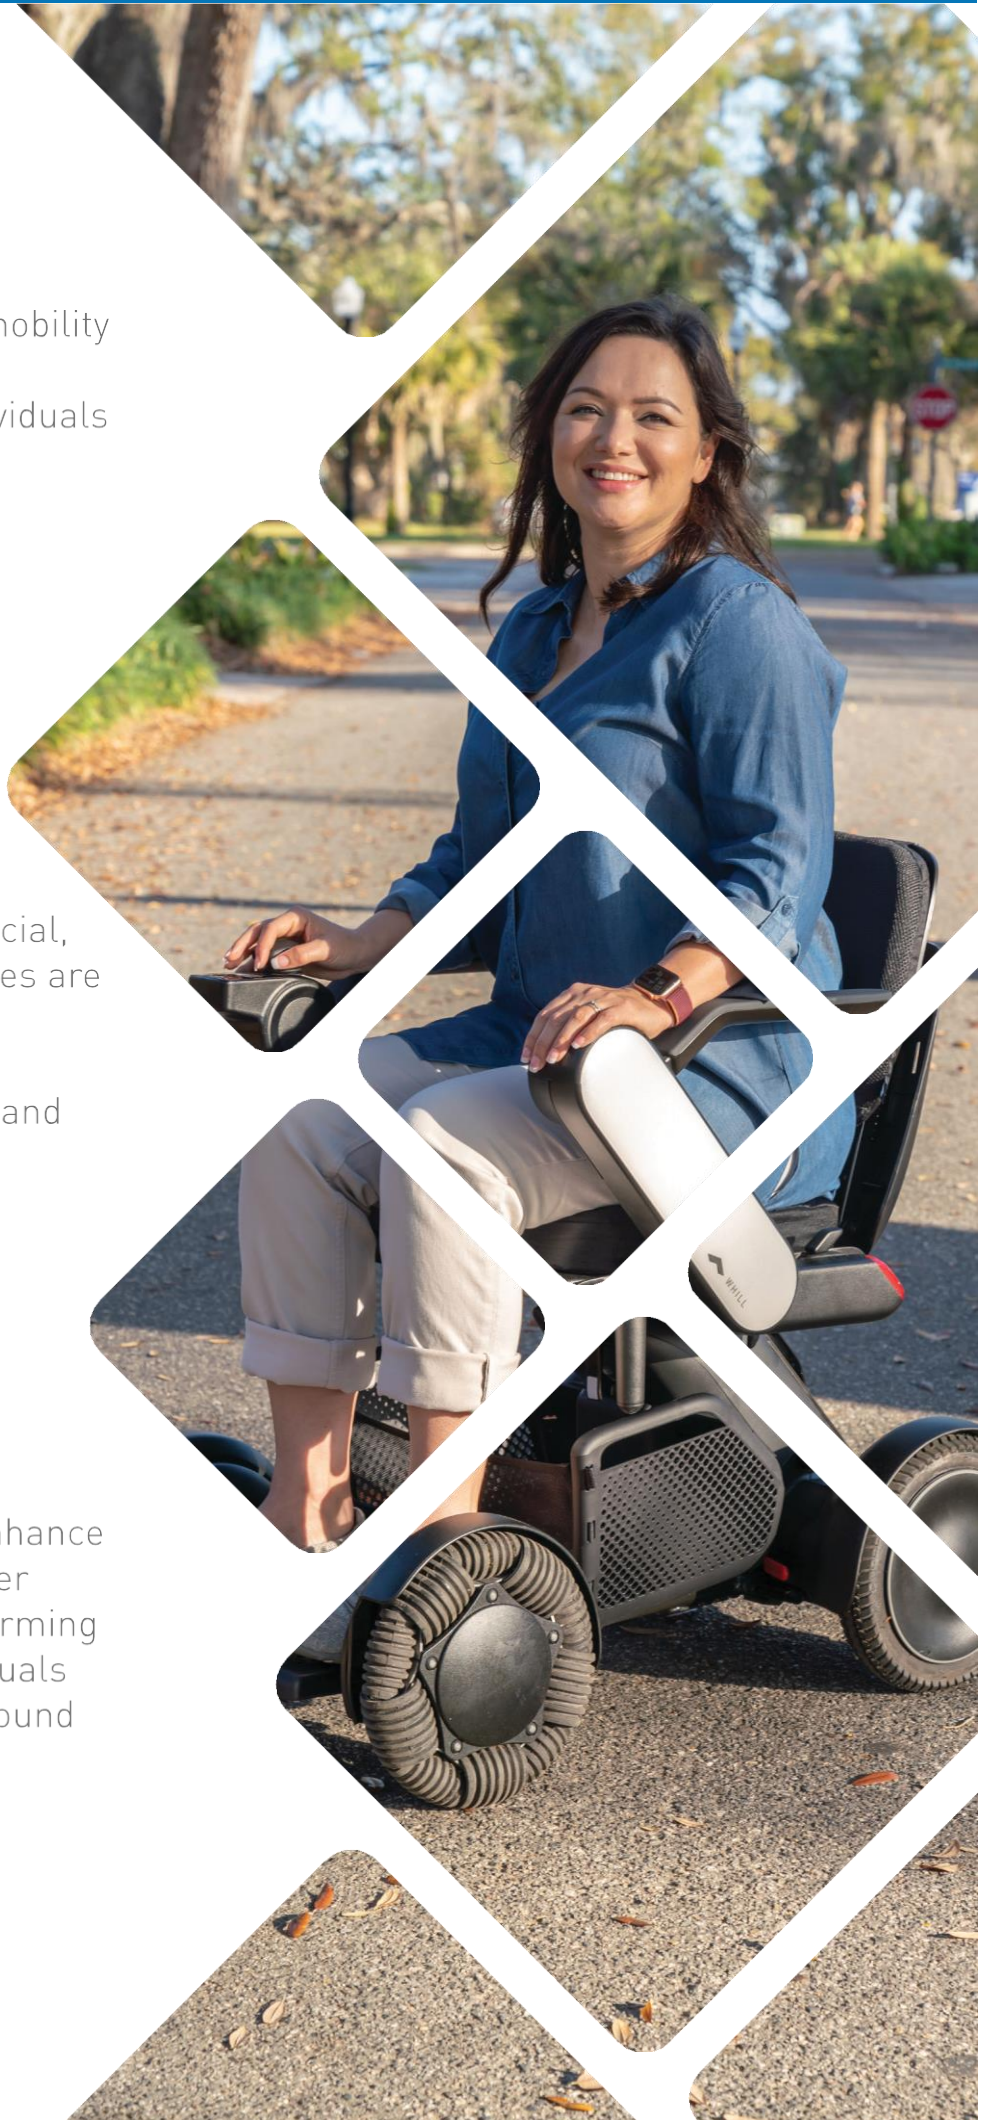

VISION

A world without barriers to mobility, where physical, social, and psychological boundaries are eliminated, and everyone, regardless of physical capabilities, can lead active and fulfilling lives.

GOAL

Innovate and improve our products continuously, harnessing technology to enhance functionality, safety, and user experience, thereby transforming personal mobility for individuals with mobility challenges around the world.

COMPANY USP_s

Personal Mobility made Easier

WHILL is creating a short-distance transportation platform which seamlessly connects infrastructure related to various locations such as airports, stations, and gated communities.

Japanese Tech for a Better World

The power of Japanese design and technology connects the world with products and services that allows anyone to use short-distance mobility whenever they want.

Freedom for Everyone

WHILL brings the technology and comfort to move around using our electric personal mobility vehicle - designed not only for seniors, but for all.
